## TECHNICAL SKILLS & ACHIEVEMENTS

**Languages:** TypeScript, Java

**Technologies:** React.js, TenStack Query, Redux toolkit, Tailwind CSS, Express.js, Node.js, Spring Boot, Clerk, Socket.IO, Prisma ORM, Redis, RazorPay, Supabase, Github

**Databases:** Postgresql, MySQL, MongoDB

**Achievements:** Awarded 1st Price in College Project Competition for developing SparkCharge - [Link](#)

## EXPERIENCE

### Suvidha Foundation

Oct 2023 – Nov 2023

FullStack Developer

Remote

- **[TASK 1]** Revamped Suvidha Foundation's website using React, enhancing user interface and experience.
- **[TASK 2]** Developed an automated offer letter generation and distribution system using **Puppeteer** for PDF creation and **NodeMailer** for seamless email delivery, reducing manual workload in the hiring process.
- **[TASK 2]** Built the project from scratch in **Node.js**, optimizing input handling for customizable templates and enhancing HR efficiency by automating repetitive tasks with secure data management.
- Received a Letter of Recommendation in recognition of outstanding performance during the internship, completing two complex projects within tight deadlines - [Link](#)

## PROJECTS

### Chatopia | React.js, Socket.IO, Clerk, Prisma, Supabase, Tailwind CSS

[Github](#)

- Implementing real-time messaging and notifications using Socket.IO, enabling instant communication between users.
- Leveraged Supabase for efficient database management and real-time database. Used Prisma ORM for streamlined database operations and queries
- Incorporated Clerk for user authentication and management, enhancing security and user control.

### SparkCharge | MERN Stack, RazorPay, Google Maps API, Tailwind CSS

[LiveLink](#)

- SparkCharge, an innovative platform that revolutionizes electric vehicle charging by allowing users to book charging slots online.
- **Google Maps Integration:** Integrated Google Maps API to provide users with location data, enabling them to easily find available charging stations.
- **Slot Booking System with RazorPay:** Implemented a robust slot booking system, allowing users to reserve charging times in advance, reducing wait times and improving resource utilization along with the RazorPay payment gateway.

### Life Chronicle | React, NodeJS, Express, TailwindCSS, MySQL

[Github](#)

- Life Chronicle is a 100-day challenge project designed to encourage daily documentation of life events and experiences
- Built with React, Node.js, Tailwind CSS, Express, and MySQL, this interactive platform helps users develop a habit of consistent journaling and storytelling by recording their daily reflections

### Personal Portfolio | React, TailwindCSS

[LiveLink](#)

- Constructed a comprehensive React-based portfolio. Demonstrated proficiency in React and Tailwind CSS to create visually appealing, user-centric interfaces

## EDUCATION

### Modern College of Arts, Science and Commerce

Expected 2026

Master of Science , Computer Application

Pune, Maharashtra

### Modern College of Arts, Science and Commerce

April 2024

Bachelor of Computer Application (CGPA: 8.68 / 10) - (SGPA(6): 9.84/10)

Pune, Maharashtra

### Modern College of Arts, Science and Commerce

April 2021

HSC (79%)

Pune, Maharashtra

### PES Modern High School

April 2019

SSC (84%)

Pune, Maharashtra
